PROFESSIONAL PROFILE

Systems Engineering student and Full Stack Developer focused on software architecture and scalable systems. Through high-complexity practical projects, I have gained advanced experience in designing resilient microservices, SaaS infrastructures, and real-time applications.

I combine my academic background in logic and systems design with modern technical expertise (MERN, Next.js, Docker, TypeScript). I aim to contribute clean, maintainable, and efficient code solutions within agile development teams.

EDUCATION

Information Systems Engineering:

National Technological University (UTN) | In progress (Level 1)

Web Development Student:

Universidad Tecnológica Nacional | 2024

Introductory Programming with Python:

TalentoTech | 2024

Advanced Training in English Language:

PAEV | 2023

NOTABLE PROJECTS

ProntoClick | Real-Time Delivery Platform

- I built a full marketplace platform with real-time communication between users and delivery drivers via WebSockets.
- I developed critical features such as live geolocation, secure authentication, and optimized global state management.
- Technologies: Next.js, NestJS, Prisma, PostgreSQL, Socket.io.

BoardWave | Remote Collaboration Platform with SFU Video and Whiteboard

- I designed and developed a scalable video-conferencing platform using an SFU (Selective Forwarding Unit) architecture with Mediasoup for low-latency audio/video streaming.
- I implemented a real-time synchronized collaborative whiteboard using WebSockets and Yjs, allowing multiple users to draw simultaneously.
- I deployed the complete infrastructure on AWS EC2 using Docker and Caddy as a reverse proxy for automatic SSL certificate management.
- Technologies: React, Mediasoup (WebRTC), Node.js, Socket.IO, Docker, AWS, Yjs.

Hard Skills:

- **Languages & Core:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, Python.
- **Backend & Architecture:** Node.js, Express, NestJS, Microservices, REST APIs, Docker, PostgreSQL, MongoDB, MySQL.
- **Modern Frontend:** React, Next.js, Redux/Zustand, Tailwind CSS, WebSockets (Socket.io).
- **Tools & Methodologies:** Git/GitHub, CI/CD (Basic), Postman, Linux, Agile methodologies (Scrum), VS Code.
- **Other Technologies:** API integration, Parallax, CSS animations.

Soft Skills:

- Analytical problem solving, effective technical communication, self-management, and continuous learning.
